- Computer Science and Engineering

PERSONAL PROJECTS

Made a Website of a pharma company (12/2023 - 01/2024)

- I made a website for a pharma company named Rashcon Pharmacon LLP as a free lancer and it was my personal project. In that project user can buy products of that pharma company from their website not only this employees can also report about their daily work. I made it using HTML, CSS, Java Script.

Making an application which detect the fake products. (04/2024 - Present)

- I am making an application which will detect the fake products when user will click the image of that product and upload to my application, I am also giving flexibility to user by giving them option of scanning bar code and QR code. If the product is fake and user wants to report it by our app at that time user can report it to the consumer forum.

Made a website for faculties of a school (12/2023 - 12/2023)

- I made a website basically for a school faculties so that they can put their lesson plan, they can see their salary, inform principal about their holidays plan. I made it by using HTML, CSS, Java Script

Wrote a content for a play (05/2029 - 05/2019)

- I was selected to write a content in a school play
